Desenvolvimento Web I

Semana 8

Element Box

Todos os elementos que são alocados no HTML geram uma caixa (Box), podendo ter propriedades como: width, height, padding, border e margins

Width = Medida da Largura (px, rem, cm, mm, %)
Height = Medida da Altura (px, rem, cm, mm, %)
Box-sizing = (content-box | border-box)
Overflow = (visible | hidden | scroll | auto)

visible

Applying the masks to the glasses is the most labor-intensive part of the process. Not only do you have to measure, place, and burnish on each mask, but you also need to completely cover the remainder of the glass in heavy paper, Any exposed areas (even inside) will get scratched by the flying sand, so it has to be a good seal.

hidden

Applying the masks to the glasses is the most labor-intensive part of the process. Not only do you have to measure, place, and burnish on each mask, but you also need to completely cover the remainder of the place.

scroll

the process. Not only do you have to measure, place, and burnish on each mask, but you also need to completely cover the remainder of the glass in heavy paper. Any exposed areas (even

auto (short text)

Applying the masks to the glasses is the most labor-intensive part of the process.

Applying the masks to the glasses is the most lail the process.

auto (long text)

Applying the masks to the glasses is the most labor-intensive part of the process. Not only do you have to measure, place, and burnish on each mask, but you also need to completely cover the remainder of the place.

Padding = Medida do espaçamento interno do componente.

O padding pode ser declarado de maneira independente, especificando o lado que será aplicado.

padding-top: 2px; padding-right: 4px; padding-bottom: 2px; padding-left: 4px;

Ou então, declarado de maneira reduzida.

padding: 2px 4px;

Margin = Medida do espaçamento externo do componente.

O margin pode ser declarado de maneira independente, especificando o lado que será aplicado.

margin-top: 2px;

margin-right: 4px;

margin-bottom: 2px;

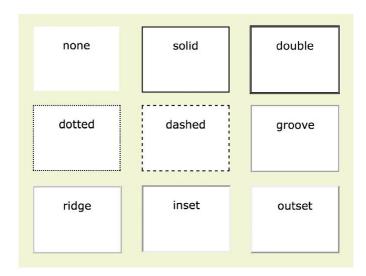

margin-left: 4px;

Ou então, declarado de maneira reduzida.

margin: 2px 4px;

Border = borda aplicada aos elementos.

border: 2px dotted #663;

Border-radius = Arredondamento da borda, os quatro cantos podem ser especificados;

border-top-right-radius: 50px;

border-radius: 50px;

Display: define como será o comportamento do elemento na página (none | inline | block | inline-block)

Box-shadow = Sombreamento do elemento, caso seja necessário, a sombra pode ser projetada internamente no elemento, usando o valor inset;

box-shadow: 6px 6px 5px gray;

Float = Colocar o elemento para flutuar (left | right | none)

Clear = Controlar os elementos flutuantes (left | right | both | none)
